Training and Placement Cell of Dr. S. & S. S. Ghandhy Government Engineering College, Surat jointly organized a webinar with ISTE Students' Chapter on "Reinvent Yourself For VUCA World" on 03.04.2021 by Dr. Kalpana Gopalan IAS (Additional Chief Secretary, Animal Husbandry, Karnataka)

Training and Placement

Ms. Kalpana Gopalan has started give brief about VUCA that We live in VUCA, short for Volatile, Uncertain, Complex and Ambiguous, times. Irrespective of our profession or life-cycle stage, VUCA defines our environment. There's persistent volatility in right from the financial markets to our personal relationships, increased uncertainty of policies, competition and employment in our profession, heightened complexity emanating from the onslaught of globalization and technology in our lives, and amplified ambiguity in the criteria for making numerous life choices. However, how much we are impacted by VUCA is merely a reflection of our disconnect with our inner self. In our modern society, we have become addicted to looking outside of ourselves for visible measures of success, like the job title, size of the house, and the brand of our car. Additionally, we are caught up in the notion of relative success – obsessed not with how well we are doing, but how we are doing compared to our peers and our social network. Hence, any circumstances that create uncertainty or volatility on these external measures are a source of significant inner turmoil for us. More than 80 participants had attended the session.
