Learning Out of Shramdan

The Students from our college have surveyed around 2600 families for utilization of toilets at home or public place constructed by the government, NGO or by any other institution at different villages as mentioned above of Umarpada taluka. Most of people were aware of toilets and they have intended to use it. Some of people family had not possessed or constructed the toilets, are advised to prepare the toilets. Student have given full efforts to make people aware about the benefit of the toilet utilization. The students have carried this activity by surveying and door to door campaign. Students have learnt the culture and conventional ideology of their living cost and life of village. They have created awareness of toilet among the people. The below given photographs are showing the interest and activity carried out in this day camp.
